

The Corporate Story

MixMOR

Mixers for Industry.

Mixers for Industry.

MixMor offers a full line of mixers, all of which are specifically designed and engineered to do more work, more efficiently, for a longer period of time without failure.

Beginning more than fifty years ago as a small west coast manufacturer of high-speed dispersers and mills primarily used in the paint industry, MixMor has since become a leading designer and manufacturer of industrial mixers and agitators for use in a broad spectrum of industries.

With decades of collective experience in mixer selection and design, MixMor's staff has the training and experience to recommend the correct mixing equipment for your particular applications...the solution best suited for your needs. Also, MixMor has a nationwide network of sales representatives ready to assist you.

High quality, best value for your equipment dollar, and a comprehensive line of mixers for every job. That's what you can expect from MixMor.

With over fifty years of experience, MixMor has supplied mixers for almost every type of application, so your requirement will probably not be new to us. The benefit is *"Since we've done it successfully before, we can do it again...for you."*

Some major industries benefiting from MixMor's experience include:
